

3.3 AUTO MAX COMPRESSOR PRODUCT INFORMATION SHEET

"Inflation/Deflation at the touch of a button"

- Use it just like a tyre inflator at a service station!!!
- Built in Pressure Switch
- Cast Alloy Air filter with Dual element filter
- Anodized Aluminium Alloy Cylinder
- Industry Leading 72 LPM
- 5 Year 'No-Fuss' Warranty
- Thermal Cut-out Protection
- Stainless Steel Valves
- Oil-less Design

SPECIFICATIONS

Part Number	55X15 with Built-in Pressure Switch
Materials	Cast Alloy air pump casing with cooling fins Cast Air Filter Diamond Plate Base Tray with rubber base
Dimensions	Unit: 290mm (L) x 190mm (H) x 150mm (W)
Capacity	• Air Flow : 72 lpm (2.54 cfm) • Maximum Draw: 30A (Fused) • Conforms to AS/NZS1044 • Max. Duty Cycle: 33% @ 100psi • Max. Ambient Temp: 70 DegC Pressure Switch: • On: 0 – 120 psi (+/- 5%) • Off: 145 psi (+/- 5%)
Weight	5.3 kg
Warranty	5 Year No-Fuss Warranty

VEHICLE APPLICATIONS

Specially designed as a quick and easy, inflation and deflation compressor for all your air-supply needs. You can simply use this compressor without the need to constantly turn it on and off. It is fantastic for use on tyres and offers not only fast inflation and ease of use, but is manufactured to the highest standards of quality and backed with a 5 year no-fuss warranty. This compressor is great for use in an onboard air system, you can simply hard-mount the compressor and fasten it to a tank, as the pressure switch is already installed.

Great for use when filling caravan, boat-trailer and trailer tyres, no need to be in reach of the compressor.

3.3 AUTO MAX COMPRESSOR

PRODUCT INFORMATION SHEET

"Inflation/Deflation at the touch of a button"

PRODUCT TIPS

- Supplied with 3 additional nozzles. Handy for inflating footballs, basketballs, bicycle tyres etc.
- Robust Carry/Storage bag with additional pockets for extra items included.
- Removable rubber-mounted base-plate to disperse vibrations.
- Supplied with hard mount kit to permanently mount compressor, dry sump allows mounting on any angle.
- Built in tyre deflation valve for controlled deflation.

SAFETY PRECAUTIONS

- Keep engine idling while inflating tyres to avoid unnecessary battery draw.
- After compressor is switched off, purge remaining pressure from the air line.

FEATURES

BENEFITS

Powerful 12 volt motor and air pump, delivering 72 litres per minute	Fast and reliable portable compressed air at an affordable price
Rubber Mounted Base-plate removable for hard mount applications	Allows dispersion of vibrations without damaged to the compressor, keeps unit clean
Quality manufactured and accredited to International ISO9002 Standards	Reliable high quality performance
Heavy Duty power lead and 40A inline fuse for compressor protection	7.5 metre coiled air hose with gauge at the tyre end of hose.
Built-in on-off switch	Built in Tyre Deflation valve for controlled deflation
Automatic Thermal Cut-off switch	Protects motor against damage from overheating
Built in Pressure Switch	Great for ease of use, use your compressor without needign to turn it on or off.
Direct Battery clamps with an in-line fuse, <u>not</u> a cigarette lighter connection	No voltage drop or blown fuses in vehicle's fuse box, easy and simple to use
Essential 4WD equipment after lowering your vehicle's tyre pressure to drive in sand, mud or rocky terrain	Robust carry/storage bag for compressor protection and storage

ACCESSORIES / SPARE PARTS

- Replacement Air Filters (Pack of 5).....(Part Number: 55X18)
- Replacement Alloy Air Filter Casing.....(Part Number: 55X17)
- Extension Hose.....(Part Number: 55X08)
