

3.3 PRO AIR COMPRESSOR PRODUCT INFORMATION SHEET

"High capacity, High Quality 12 Volt Air Compressor"

SPECIFICATIONS

Part Number	55X02
Materials	Cast Alloy air pump casing with cooling fins
Dimensions	Unit: 230mm (L) x 200mm (H) x 130mm (W)
Capacity	•Flow Rate: 55 Litres per minute •Max. Voltage: 13.8V •Maximum Output: 150 psi • Maximum Duty Cycle: 40 mins. @ 30psi. @ 24 Deg C continuous •Maximum Draw: 23A •Max. Ambient Temp: 60 Deg C
Weight	3.0 kg
Warranty	5 Year No-Fuss Warranty

VEHICLE APPLICATIONS

Specially designed for pumping large 4x4 tyres and truck tyres.

PRODUCT TIPS

- Supplied with 3 additional nozzles. Handy for inflating footballs, basketballs, bicycle tyres etc.
- Robust Carry/Storage bag included.
- Rubber mounted base-plate for disperse vibrations.

3.3 PRO AIR COMPRESSOR PRODUCT INFORMATION SHEET

"High capacity, High Quality 12 Volt Air Compressor"

SAFETY PRECAUTIONS

- Keep engine idling while inflating tyres to avoid unnecessary battery draw.

FEATURES	BENEFITS
Powerful 12 volt motor and air pump, delivering 55 litres per minute	Fast and reliable portable compressed air at an affordable price
Rubber Mounted Base-plate	Allows dispersion of vibrations without damaged to the compressor
Quality manufactured and accredited to International ISO9002 Standards	Reliable high quality performance
5 metre long power lead and inline fuse for compressor protection	Will easily reach all four wheels from your vehicle's battery
Built-in on-off switch conveniently located at your finger tips	Unit mounted gauge is Easy to read
Automatic Thermal Cut-off switch	Protects motor against damage from overheating
Direct Battery clamps with an in-line fuse, <u>not</u> a cigarette lighter connection	No voltage drop or blown fuses in vehicle's fuse box, easy and simple to use
Essential 4WD equipment after lowering your vehicle's tyre pressure to drive in sand, mud or rocky terrain	Robust carry/storage bag for compressor protection and storage
