PRODUCT INFORMATION

4.2 X-Trax II

PRODUCT INFORMATION SHEET

"Offroad Recovery Tracks – Sand, Mud, Snow"

SAFETY AND MAINTENANCE

- All observers are to be at least 20m away from recovery and away from the direction of recovery at all times.
- Never push the vehicle during recovery.
- Never place any part of your body under the vehicle during recovery operations.
- Ensure immobile vehicle is stable and not in a position where roll over could occur prior to getting out of the vehicle or commencing vehicle recovery.
- Inspect X-Trax II for damage before use, if damage to the cable exists, discard.

ENVIRONMENT

Please take care in preserving the environment. Once the vehicle is recovered, fill in any holes and ensure the surroundings are safe for the next vehicle and returned to the original conditions.
