

Restore it

Exmoor Trim have a range of handmade products, with the attention to detail that will compliment your Series II or III restoration, to transform the interior back to its former glory.

Deluxe Front Seating

This style of traditional Deluxe Series III seating was originally available in Black vinyl with its distinctive, sculptured sides and face fluting that runs through the centre of the seat panels.

The outer seat backs bolt in and also have internal threads for the locking positions. The centre seat back mounts with the pin type fitting. The outer bases and centre bases sit into the seat frames and are removable to allow access to the seat box compartments.

Standard Front Seating

This style of traditional Standard Series II & IIA, seating is available in Black Vinyl, Grey Vinyl & the classic Elephant Hide Grey as shown.

The front seat cushions and squabs, although now using modern high quality foam, have superb feel and ride, with the metal back plates beautifully reproduced as original. Metal-backed squabs were only ever used and were available with two types of fixing with either bolt or pin type available.

Door Trim panels

Front Door trim sets for the Series II & III, include top panel with arm rest & main door panels with the option of with or without pockets.

We also manufacture side door panels and rear door trims. All available in Black vinyl or Elephant Hide Grey.

Hardura Interior Kit

Exmoor Trim have reproduced the original interior finish for the Series 11 & 111 cab interiors. The Hardura was widely used as the standard interior finish for these early Land Rovers. The Hardura is a plastic coated felt with bound edges. The material is very hard wearing and offered a wipe clean surface whilst also offering some sound insulation (although limited).

This is a great kit that will finish off your interior with the original look and appeal. The kit is available in left or right hand drive options. (Will not fit 6 cylinder or lightweight).

Canvas Hoods. **deep weave**
classic canvas

Exmoor Trim's skilled staff understand exactly what is required and ensure that all our hoods are made with care and attention to detail. Deep Weave Canvas is the new benchmark set by Exmoor Trim when using a 100% natural Cotton fibre. Canvas has many pitfalls and by using modern manufacturing techniques and proofing we have reproduced the original colour, greatly reduced shrinkage and retained all the crucial features that all our customers have come to expect from an Exmoor Trim Hood.

Hood Stick Sets.

Exmoor Trim supply a high quality range of galvanised hood stick sets to fit all variations of Series II & III Land Rover hoods.

2 Man Rear Bench Seats

Exmoor Trim 2 Man Bench seats are available in Black powder coating or the original galvanised finish and carefully manufactured to blend with your Land Rover interior by using the same frame design, that was originally used and incorporated the correct style of steel seat back pans.

NEW Soft Top Seat belt Bar

This kit allows the Soft top land Rover owner to install 3 point inertia belts for the driver and passenger seats. The bar runs accross the width of the vehicle and has the inertia reel and top mounting points built in. The kit is supplied with all its fixings. Seat belts are also available.
