ARMORTEK SYNTHETIC ROPE

ARMORTEK
WINCH ROPES

Armortek synthetic winch rope is made with high strength HMPE light weight fibre. It undergoes a unique pre stretching process and is coated with the special Armortek abrasion resistant coating to enable maximum pull and the ultimate endurance.

UV Stabilisation gives the rope long and safe working life. Not affected by oil or water and is just as strong whether used in dry, wet, cold or humid conditions. Armortek stretches very little (3 - 4 % at break) and very safe to use. It stores little energy and hence no lash backs in the unlikely event of breaking.

- Armortek weighs 6 times less than wire.
- Armortek is rated at 70 percent stronger than wire.
- Armortek floats, wire doesn't.
- Armortek is coated to prevent abrasion.
- You don't have to worry about wire splinters.
- No strength loss when overlapped on winch drum.
- Unlike wire, Armortek will not whiplash if broken.
- Armortek comes pre-stretched and heat set.
- Armortek is available in a number of lengths.

CENTURION WIRELESS REMOTE

CENTURION

The Centurion remote is designed & manufactured in Europe. The ultimate remote for the professional user.

- Two-way Closeslink wireless communication.
- Distinct source code so no interference from other remotes in the vicinity.
- Centurion devices are perfectly watertight thanks to protection level IP67.
- The remote floats.
- The Centurion handheld devices are all manufactured in highly resistant moulded plastic with a rubber shell that makes its hold firmer and protects against knocks, even if dropped from a height of 4 metres.
- The absence of mechanical elements enables functioning in unfavourable environments, with a temperature range from -20°C to +55°C.
- All the output is protected from short circuits, surges and inverse voltage to enable parallel functioning with other actuators.
- The Centurion adheres to multiple compliance standards.
- Buttons 10mm in diameter, with a wide inter-axis, with clear and effortless contact make the keypad suitable for all users.
- The use of specific components against power supply pole inversion guarantees the integrity of the device during installation and maintenance operations.
